

Release Notes

January 25 2016

These Release Notes are intended for users and administrators of Lockdown and JailATM.com. They provide you with information about Lockdown and JailATM.com updates, including the new features of this release and important changes since the previous one.

We recommend that you read this document before installing and using Lockdown.

This document may be updated after it is released.

New This Release

- | | |
|------------------|---|
| 8.0.196.0 | Lockdown - US Bank Positive Pay - CSV fields
<i>Previously US Bank Positive Pay Format utilized fixed record / field lengths. This version separates values with a comma.</i> |
| WEB | Tablets - Features - More Books
<i>Updated the books feature to include HTML based books in conjunction with the PNG books we already had.</i> |
| WEB | JailATM.com - Tablets - Maximum Logins Before Charging
<i>Added ability to set maximum logins before charging on tablets. This will require the resident to return the tablet to the docking bay to charge before being allowed to login again. A gold pass will bypass this restriction.</i> |

Enhancements

- | | |
|------------------|--|
| 8.0.192.0 | Lockdown - Receipts - Multiple Onsite Receipt Copies
<i>Onsite commissary receipts now respect the option on the Receipt Print tab that says how many copies to print at a time.</i> |
| 8.0.193.0 | Lockdown - Reports - Wording Change on Phone PIN Report
<i>Changed wording to reference commissary system instead of phone system to reduce confusion.</i> |
| 8.0.198.0 | Lockdown - ACH Deposits - Duplicate ACH Message |

Lockdown will no longer display the ACH Import Problem message on the Main Status page if the error was caused by a duplicate ACH.

Fixed Known Issues

- 8.0.195.0 Lockdown - Releases - Fixed Collect Only On Release**
Fixed an issue where Collect Only On Release would collect debt even if the resident is currently active.
- 8.0.198.0 Lockdown - ACH Deposits - Multi-Facility ACH Duplicate Imports**
Lockdown will now add the bank account associated with the ACH to the CheckPayableTo field so that ACHs with the same amount and same dates at multi-facility setups will no longer incorrectly flag as duplicate. This also comes with a Database Upgrade that retroactively adds the bank account number to the end of the checkpayableto field
- 8.0.199.0 Lockdown - Scheduled Payments - From "Through" to "To"**
Scheduled payments now say "to" instead of "through" in all transactions except the final transaction of the scheduled payment.
