

## Release Notes

### June 22 2015

These Release Notes are intended for users and administrators of Lockdown and JailATM.com. They provide you with information about Lockdown and JailATM.com updates, including the new features of this release and important changes since the previous one.

We recommend that you read this document before installing and using Lockdown.

This document may be updated after it is released.

## New This Release

---

- |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8.0.28.0</b> | <b>Lightspeed API</b><br><i>Lightspeed API was added to Lockdown which allows inventory adjustments.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>8.0.38.0</b> | <b>TAC10 JMS Interface</b><br><i>Created New JMS Interface TAC10</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>8.0.43.0</b> | <b>Added Resident Is Active to Restriction Rule Settings</b><br><i>Previously, all restrictions applied to everyone even if they were closed/released from Lockdown. The setting "Open" in the restriction rules will now allow the user to pinpoint the status of the resident. The options are: (Y) for only open accounts, (N) for only closed accounts or (*) for all accounts (this is the default functionality).</i>                                                                                                                                                                         |
| <b>8.0.43.0</b> | <b>Added Balance Over Time Restriction Rules Settings</b><br><i>Previously, restrictions could not apply to residents based on their balance over a period of time. The settings: "\$ Min", "\$ Max", "\$ Period" and "\$ Period Disqualifier" have been added to the restriction rules. With these settings the resident's balance can be checked over a period of time determined by the user with "\$ Period" with the balance range determined by "\$ Min" and "\$ Max." Lastly, the disqualifier can be used to determine when that resident no longer meets the restriction requirements.</i> |
| <b>8.0.44.0</b> | <b>OIS Update</b><br><i>Added the ability to import in book-in date and an automatic admit kit billing for the syscon interface. There was also an update to the OIS service.</i>                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>WEB</b>      | <b>Checking In For Video Visitation Is Now Optional</b><br><i>It is now optional for facilities to require family members to check in prior to doing internal video visitation.</i>                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Enhancements

---

- 8.0.13.0 JailTracker Imports DOC Number**  
*Jail Tracker will now import the DOC Number from the JMS File.*
- 8.0.31.0 Second Signature Line for Cash Reciepts**  
*There is now a 2nd signature line on Cash Receipts so that both the resident and officer can sign the receipt*
- 8.0.32.0 Visions JMS now handles re-opening**  
*Numerous improvements have been made to the Visions interface. Visions now handles re-opens and blank birthday fields correctly. Options have also been added to enable/disable automatic account closures. Lastly, an option was added to enable/disable "Ignore Balance When Closing."*
- 8.0.38.0 JailTracker V2 JMS Interface**  
*Upgraded version of the existing JailTracker Interface to allow for more flexible resident billing.*
- 8.0.42.0 Added Location to Resident List Report on Resident Orders Reports**  
*Added a locations column to the Resident List, Product Sales Report (Green Icon) on the Orders->Reports screen. These reports will also use the sort option on this screen.*
- WEB Workflow Status Summary Report Added To Workflow Reports**  
*Workflow Status Summary Report will list all of the various types of workflows and the statues for issues and give the number in each status for however many are in their respective statues at the time of the report being ran. It will also show how many issues are currently assigned to the group the workflow assigns the issues to.*
- WEB Keyword Search Added To Workflow Interaction Report**  
*A Keyword Search has been added to the Workflow Interaction Report. If the word is found it will highlight the word in the report.*
- WEB Workflow Resident Statistics Report Added To Workflow Reports**  
*Workflow Resident Statistics Report show the workflow issues a resident has submitted, and all other statuses, separated by workflow type.*
- WEB PREA Statistic Reports**  
*Created two reports, PREA Group/User Response Report and PREA Resident Statistics Report. The PREA Group/User Response Report shows the number of PREA issues any user or group has acted on. The PREA Resident Statistics Report shows the number of PREA issues that a Resident has submitted.*
- WEB Workflow Group/User Response Statistics Report**  
*The Workflow Group/User Response Statistics Report shows the number of issues any user or group has acted on separated by workflow and each status.*

## Fixed Known Issues

---

- 8.0.33.0 Double Voiding issue**  
*It was found that a check can be double voided if 2 terminals void at exactly the same time. This update should cause the 2nd terminal to see an error that the check was already voided.*
- 8.0.46.0 Resident Invoice Report uses Global Dates.**  
*Resident Invoice Report will now respect Global Dates when ran.*
- 8.0.46.0 Spillman WS Location Issue**  
*This update cleans up values between reading residents in the Spillman WS JMS Interface. This will keep locations (and other values) from carrying over from one resident to the next.*
- WEB Family Members Can Now Send Edited Drafts**

*We are no longer loading html encoded characters when loading drafts.*

**WEB**

**Multiple Active Gold Passes Fix**

*Fixed an issue with residents having multiple active gold passes*

## Further Information
